AGGIUNGERE UTENTI E REVIEW

AGGIUNGERE UTENTI E REVIEW

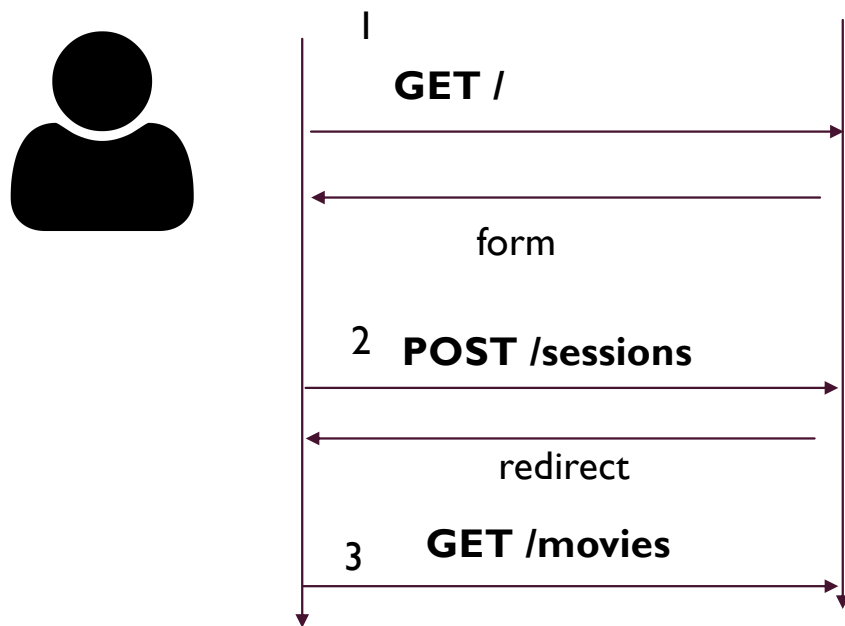

MOVIEGOER

AS a movigoer
SO THAT I can review movies
I want to login

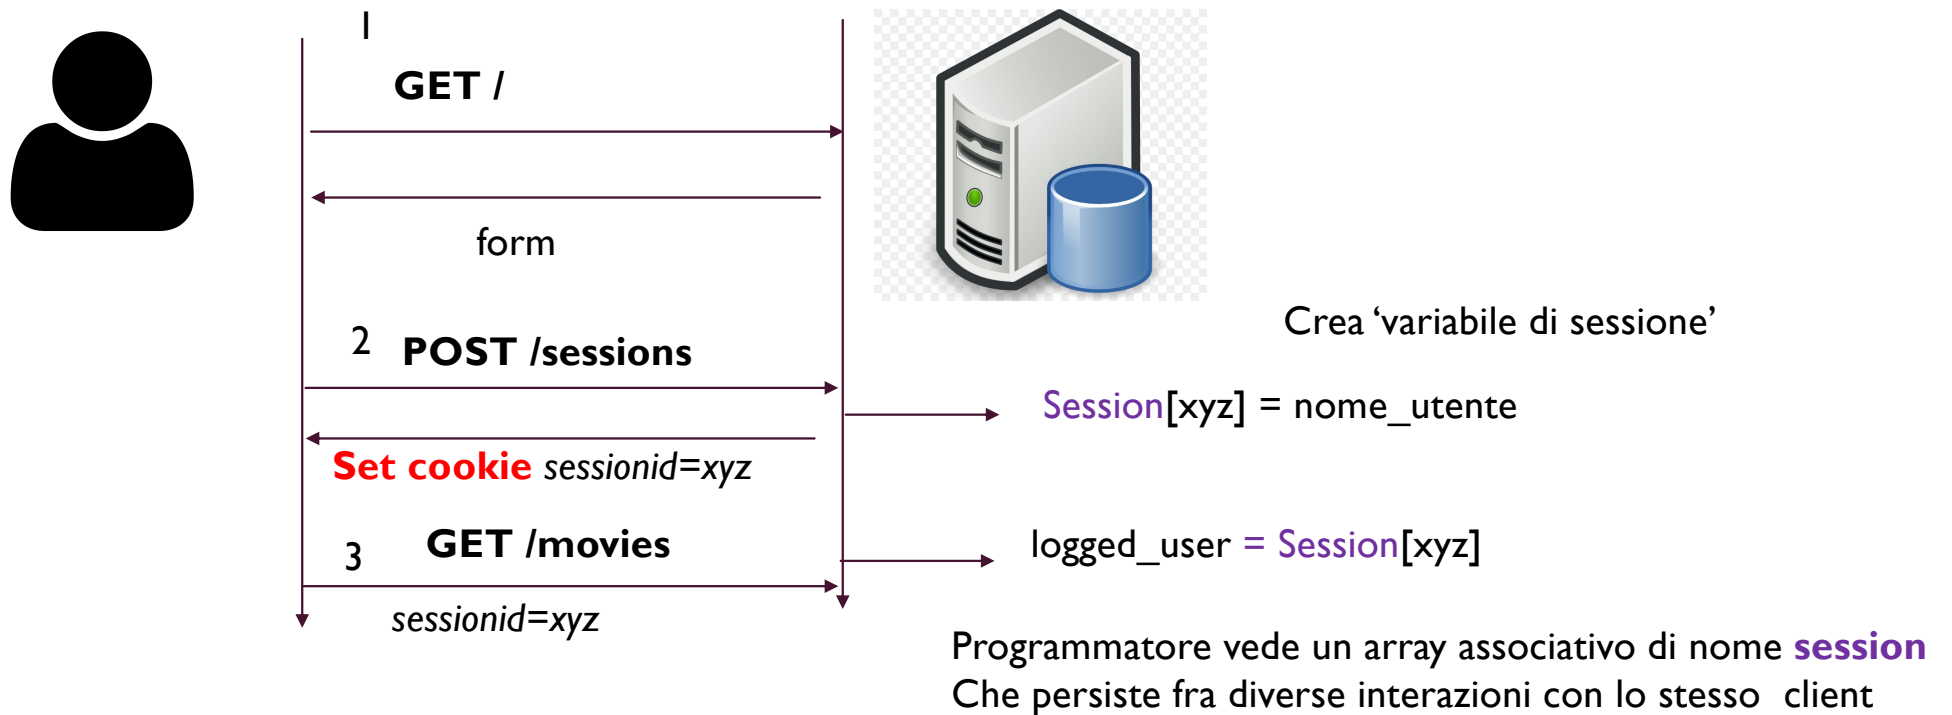

When I am on RottenPotatoes
And I follow login button
And I put correct crediants
I want to see movie page

USER LOGIN IMPLEMENTAZIONE SEMPLICE – HAPPY PATH

When I am on RottenPotatoes → 1
And I follow login button → 2
And I put correct crediants test → 2.a
I want to see movie page with user test logged in → 3

USER LOGIN IMPLEMENTAZIONE SEMPLICE – HAPPY PATH

USER

1. rails g model Moviegoer name:string password:string
2. rails g controller Moviegoers
3. rails g controller Sessions
4. rails db:migrate
5. Aggiornare file routes.rb:
6. Creare **show.html.haml**
7. Definire metodi **Moviegoers#show** e **Sessions#create**

ROUTES

```
Rails.application.routes.draw do
  get '/' => 'moviegoers#show'
  post '/login' => 'sessions#create'
  get '/login' => 'moviegoers#show'

  resources :movies

end
```

VIEW

```
%h2 Login
= form_tag login_path, :method => :post do

  = text_field :user, :name
  = label :user, :name, 'Name'

  %br
  = password_field :user, :password
  = label :user, :password, 'Password'

  %br

  = submit_tag 'Submit'
```

CONTROLLERS

```
class MoviegoersController < ApplicationController
  def show
  end
end
```

```
class SessionsController < ApplicationController
  def create
    redirect_to movies_path
  end
end
```

AGGIUNGO UN MOVIEGOER DI PROVA...

```
3.0.0 :004 > Moviegoer.create(:name => 'test')  
TRANSACTION (0.1ms) begin transaction  
Moviegoer Create (6.5ms) INSERT INTO "moviegoers" ("name",  
"created_at", "updated_at") VALUES (?, ?, ?)
```

```
class SessionsController < ApplicationController
  def create
    name = params[:user][:name]
    @current_user = Moviegoer.where(:name=> name)
    if @current_user.length==0 then
      redirect_to login_path
    else
      @current_user[0][:id]
      session[:user]=@current_user[0][:name]
      redirect_to movies_path
    end
  end
end
```

```
